

## LIST OF BOXES, CHARTS AND TABLES

---

### BOXES

Box 1.1:	The international response to climate change.....	3
Box 2.1:	Sources of greenhouse gas emissions .....	8
Box 2.2:	Market-based policy responses to climate change .....	9
Box 2.3:	Policy assumptions in the modelling .....	10
Box 2.4:	Australia as a part of international action .....	11
Box 2.5:	Measuring emissions .....	17
Box 2.6:	Projections over long timeframes.....	18
Box 2.7:	Market exchange rate versus purchasing power parity .....	19
Box 2.8:	Alternative way to report on modelling — a hypothetical example .....	21
Box 3.1:	Climate change policies in the reference scenario.....	28
Box 3.2:	Reference scenarios compared .....	32
Box 3.3:	Climate change projections in the reference scenario .....	35
Box 3.4:	The reference scenario in G-Cubed .....	46
Box 3.5:	Energy efficiency.....	50
Box 3.6:	Commodity prices .....	57
Box 3.7:	Methodology for household spending distributional analysis .....	68
Box 4.1:	Climate change projections: stabilisation at 450 and 550 ppm .....	77
Box 4.2:	Alternative specifications of targets.....	78
Box 4.3:	Depletion of natural resources .....	79
Box 4.4:	Emission targets, mitigation and trade .....	81
Box 5.1:	The emission price in G-Cubed.....	95
Box 5.2:	How do mitigation costs arise? .....	101
Box 5.3:	Forward-looking behaviour and early action .....	102
Box 5.4:	Impact of a multi-stage global framework.....	104
Box 5.5:	Implications of revising stabilisation goals.....	105
Box 5.6:	Comparison with other mitigation cost studies.....	108
Box 5.7:	The role of carbon capture and storage .....	127
Box 5.8:	Electric vehicles and fuel cell technology .....	131
Box 5.9:	Future transport fuels .....	132
Box 6.1:	Difference in GNP and GDP impacts across models .....	148
Box 6.2:	Unavoidable mitigation cost impacts.....	154
Box 6.3:	Impact on domestic consumption.....	156
Box 6.4:	Revenue recycling.....	156
Box 6.5:	Technology sensitivity details.....	159
Box 6.6:	Sectoral impacts and structural adjustment .....	166
Box 6.7:	Impact on competitiveness in a multi-stage world: the role of shielding.....	169
Box 6.8:	Modelling of electricity generation in GTEM and MMRF .....	177
Box 6.9:	Early retirement of power plants .....	178
Box 6.10:	The expanded Renewable Energy Target.....	180
Box 6.11:	Mitigation policy and inflation .....	192

## CHARTS

Chart 1:	Five pathways for Australian emissions and GNP .....	xii
Chart 2:	Emission reductions by sector .....	xv
Chart 2.1:	Integrating the suite of models .....	15
Chart 2.2:	GDP — hypothetical reference and policy scenarios .....	21
Chart 3.1:	Gross world product per capita growth.....	29
Chart 3.2:	Fuel combustion emissions.....	30
Chart 3.3:	Global emissions by gas .....	31
Chart 3.4:	Global greenhouse gas emissions .....	32
Chart 3.5:	Emission intensity .....	32
Chart 3.6:	Shares of global emissions .....	33
Chart 3.7:	Gross world product growth .....	35
Chart 3.8:	World population .....	36
Chart 3.9:	Gross world product per capita growth.....	36
Chart 3.10:	Gross domestic product per adult .....	37
Chart 3.11:	Distribution of gross world product.....	38
Chart 3.12:	Share of total output by sector .....	39
Chart 3.13:	Global emissions by sector .....	40
Chart 3.14:	World electricity demand.....	41
Chart 3.15:	World electricity generation by fuel .....	41
Chart 3.16:	World electricity emissions by fuel .....	42
Chart 3.17:	Mode of global transport .....	42
Chart 3.18:	Global transport emissions.....	43
Chart 3.19:	Global road transport technology share .....	44
Chart 3.20:	Real GNP and real GNP per capita .....	47
Chart 3.21:	Australian emissions .....	48
Chart 3.22:	Share of cumulative emissions 2005 to 2050.....	49
Chart 3.23:	Emission intensity .....	50
Chart 3.24:	Emissions in Australia.....	51
Chart 3.25:	Emissions by state/territory .....	52
Chart 3.26:	Decomposition of GDP growth.....	52
Chart 3.27:	Australian population.....	53
Chart 3.28:	Australia's terms of trade .....	54
Chart 3.29:	Australian GDP and GNP levels .....	55
Chart 3.30:	Consumption, investment and export shares of GDP .....	56
Chart 3.31:	Commodity price assumptions .....	57
Chart 3.32:	Export shares by key sectors.....	58
Chart 3.33:	Value added shares .....	59
Chart 3.34:	Electricity sector .....	60
Chart 3.35:	Australian electricity generation, technology shares .....	61
Chart 3.36:	Transport sector.....	62
Chart 3.37:	Road transport sector.....	63
Chart 3.38:	Road transport sector.....	64
Chart 3.39:	Australian land under forestry, and associated sequestration.....	65
Chart 3.40:	Emission-intensive industries.....	66
Chart 3.41:	Aggregate household spending .....	67
Chart 3.42:	Spending on energy as a percentage of all spending .....	69
Chart 3.43:	Spending on energy as a percentage of all spending .....	69

Chart 3.44:	Spending on energy by household size .....	70
Chart 4.1:	Australian emission allocations .....	76
Chart 4.2:	Global emissions and allocations.....	80
Chart 4.3:	Global emissions pathway and allocation .....	80
Chart 4.4:	Multi-stage emission allocations: relative to reference scenario .....	83
Chart 4.5:	Contraction and convergence approach .....	84
Chart 5.1:	Global emission allocations.....	92
Chart 5.2:	Global emission prices .....	94
Chart 5.3:	Emissions, allocations and cumulative banked permits .....	96
Chart 5.4:	Decomposition of global mitigation by gas .....	97
Chart 5.5:	GTEM: Gross world product per capita .....	98
Chart 5.6:	GTEM: Gross world product.....	98
Chart 5.7:	G-Cubed: Gross world product .....	99
Chart 5.8:	Emission intensity of gross world product .....	100
Chart 5.9:	Cost of global mitigation policy delay .....	103
Chart 5.10:	Gross world product.....	105
Chart 5.11:	GNP mitigation costs across regions .....	107
Chart 5.12:	Mitigation by gas .....	113
Chart 5.13:	Contribution of international income transfers to GNP .....	114
Chart 5.14:	Contribution of international income transfers to GNP .....	114
Chart 5.15:	Terms of trade.....	115
Chart 5.16:	GTEM sectoral output relative to the reference scenario in 2020 .....	119
Chart 5.17:	G-Cubed sectoral output relative to the reference scenario in 2020 .....	120
Chart 5.18:	GTEM sectoral output relative to the reference scenario in 2050 .....	120
Chart 5.19:	G-Cubed sectoral output relative to the reference scenario in 2050 .....	121
Chart 5.20:	Global emissions mitigation, by sector .....	122
Chart 5.21:	Global emissions mitigation, by sector .....	123
Chart 5.22:	Emission intensity of world electricity generation .....	124
Chart 5.23:	Global electricity generation, Change from reference scenario.....	124
Chart 5.24:	Global electricity sector technology share.....	125
Chart 5.25:	Composition of renewable electricity generation .....	126
Chart 5.26:	Global technology shares in electricity generation .....	127
Chart 5.27:	Regional electricity supply prices .....	128
Chart 5.28:	Global transport emissions.....	129
Chart 5.29:	Cost of transport technology .....	130
Chart 5.30:	Transport technology shares.....	130
Chart 5.31:	Cumulative global sequestration from land-use change and forestry.....	131
Chart 5.32:	Global agriculture emissions .....	133
Chart 6.1:	Australian emission allocations and GNP per capita.....	138
Chart 6.2:	Australia's emission allocation .....	139
Chart 6.3:	Australian emission price .....	140
Chart 6.4:	Australia's emission pathways .....	141
Chart 6.5:	Emission intensity of GDP.....	141
Chart 6.6:	Sector emissions.....	142
Chart 6.7:	Share of cumulative emission reductions by sector .....	143
Chart 6.8:	Sector emissions.....	143
Chart 6.9:	GNP per capita .....	144
Chart 6.10:	Gross domestic product .....	145
Chart 6.11:	Capital Stock and Investment .....	151

Chart 6.12:	Real wages .....	151
Chart 6.13:	Terms of trade.....	153
Chart 6.14:	Australia's actual emissions, allocations and permit trading .....	155
Chart 6.15:	Domestic consumption.....	156
Chart 6.16:	Australian gross national product.....	157
Chart 6.17:	Gross State Product.....	161
Chart 6.18:	Gross State Product.....	161
Chart 6.19:	Emission intensity .....	162
Chart 6.20:	Australia's coal sector .....	167
Chart 6.21:	Trade-exposed emission-intensive industries - emissions .....	168
Chart 6.22:	Australian aluminium output relative to current levels .....	170
Chart 6.23:	Electricity demand.....	173
Chart 6.24:	Emission intensity of electricity technologies .....	173
Chart 6.25:	Technology shares of generation.....	174
Chart 6.26:	Emission intensity of electricity generation.....	175
Chart 6.27:	Average Australian wholesale electricity prices .....	175
Chart 6.28:	Gas-fired electricity generation .....	178
Chart 6.29:	Coal and gas generation .....	179
Chart 6.30:	Renewables capacity .....	180
Chart 6.31:	Electricity sector emissions .....	181
Chart 6.32:	Transport sector emissions .....	182
Chart 6.33:	Contribution to transport mitigation .....	183
Chart 6.34:	Distance travelled by mode of road transport.....	184
Chart 6.35:	Road transport fuel mix .....	184
Chart 6.36:	Australian additional land under forestry .....	185
Chart 6.37:	Australian forestry sequestration.....	186
Chart 6.38:	Private per capita consumption.....	187
Chart 6.39:	Household expenditure shares in 2020.....	188
Chart A.1:	How the suite of models fit together .....	220
Chart B.1:	Emission allocations by region.....	227
Chart B.2:	Contraction and convergence approach .....	228
Chart B.3:	Australian population.....	234
Chart B.4:	Industry labour-augmenting technical change.....	236
Chart B.5:	Australia's terms of trade .....	240
Chart B.6:	Energy commodity price assumptions.....	241
Chart B.7:	Domestic Australian gas prices.....	243
Chart B.8:	Cumulative renewable capacity constraints — MMA .....	254

## TABLES

Table 1:	Australia's emissions and economy .....	xii
Table 2.1:	CO <sub>2</sub> emissions from energy, 2005 .....	11
Table 3.1:	Global emissions.....	31
Table 3.2:	Emissions by region.....	34
Table 3.3:	Gross domestic product per capita .....	37
Table 3.4:	Global plantations and deforestation.....	44
Table 3.5:	Cumulative global land-use change and forestry emissions since 2005 .....	45
Table 3.6:	Growth of other emission-intensive sectors .....	45
Table 3.7:	Share of world emissions (direct and indirect) .....	46
Table 3.8:	Emissions by source .....	48
Table 3.9:	Population growth by state/territory.....	53
Table 3.10:	Consumption shares, 2020 .....	55
Table 3.11:	Gross state product.....	58
Table 3.12:	Spending on energy by principal source of household income, 2010-11 .....	71
Table 4.1:	Summary of emission trajectories .....	76
Table 4.2:	Advantages and disadvantages of different climate change targets .....	78
Table 4.3:	Summary of policy mechanisms .....	86
Table 5.1:	Global emission allocations.....	91
Table 5.2:	National emission allocations.....	93
Table 5.3:	Global emission prices .....	93
Table 5.4:	Emission prices (US\$/tCO <sub>2</sub> -e, nominal) first year of scheme .....	95
Table 5.5:	Global allocations, emissions and banked permits .....	96
Table 5.6:	Gross world product, change from reference scenario.....	99
Table 5.7:	Gross world product, average annual growth rates.....	99
Table 5.8:	Regional GDP costs in 2050 .....	104
Table 5.9:	Net present value of GWP .....	106
Table 5.10:	Gross world product mitigation cost estimates.....	108
Table 5.11:	Emission Intensity of GDP .....	109
Table 5.12:	Regional GNP costs.....	110
Table 5.13:	Delay in growth, GNP per capita.....	111
Table 5.14:	Regional GDP costs.....	112
Table 5.15:	Terms of trade impacts .....	115
Table 5.16:	GTEM international trade in permits .....	116
Table 5.17:	GTEM regional emissions .....	116
Table 5.18:	G-Cubed international trade in permits .....	117
Table 5.19:	G-Cubed CO <sub>2</sub> -e permit prices .....	117
Table 5.20:	GTEM regional real exchange rate impacts .....	118
Table 5.21:	Emissions by sector .....	122
Table 5.22:	Global land-use and forestry sequestration.....	133
Table 5.23:	Direct and indirect emissions for other emission-intensive sectors .....	134
Table 6.1:	Mitigation scenarios .....	139
Table 6.2:	GNP per capita annual growth rates .....	144
Table 6.3:	GDP annual growth rates.....	145
Table 6.4:	Headline national indicators .....	146
Table 6.5:	Other national indicators .....	147
Table 6.6:	Contributions to GNP .....	149
Table 6.7:	Industry investment.....	152
Table 6.8:	Australian allocation, emissions, trade and banking .....	155
Table 6.9:	Technology sensitivities .....	158
Table 6.10:	Impacts at the sectoral level.....	162
Table 6.11:	Gross output, by sector, 2050.....	164

Table 6.12:	Employment, by sector, 2050.....	165
Table 6.13:	Electricity sector emissions reductions.....	172
Table 6.14:	Average wholesale electricity price increase.....	176
Table 6.15:	Average household electricity price increases.....	176
Table 6.16:	Carbon capture and storage, estimated deployment year and emission price.....	179
Table 6.17:	Transport output.....	183
Table 6.18:	Estimated price impacts by household type.....	190
Table 6.19:	Estimated price impacts by household type.....	190
Table 6.20:	Estimated price impacts by region in 2010.....	191
Table 6.21:	Estimated price impacts by region in 2010.....	191
Table A.1:	Regions and sectors of GTEM.....	206
Table A.2:	Database change: increase in wage bill for former Soviet Union.....	208
Table A.3:	Regions and sectors of G-Cubed.....	210
Table A.4:	Sectoral aggregation in MMRF.....	215
Table A.5:	Concordance of GTEM and MMRF sectors.....	221
Table A.6:	Inputs and Outputs of the Energy Sector Model (ESM).....	223
Table B.1:	Key emissions trading scheme design features, policy scenarios.....	226
Table B.2:	Regional groupings in GTEM and G-Cubed.....	227
Table B.3:	Summary of offset credit assumptions.....	229
Table B.4:	Carbon pollution reduction scheme design.....	229
Table B.5:	World GDP (GTEM regions).....	232
Table B.6:	Australia's population, productivity and GDP.....	232
Table B.7:	Gross state product.....	233
Table B.8:	State population.....	234
Table B.9:	Global population level and growth rates (GTEM regions).....	235
Table B.10:	Productivity level to the US level (GTEM regions).....	238
Table B.11:	Sectoral labour productivity distribution.....	238
Table B.12:	Change in factor efficiency per doubling in the level of extraction.....	242
Table B.13:	Intermediate input usage in MMRF <sup>(a)</sup> .....	244
Table B.14:	Intermediate input efficiency, GTEM.....	245
Table B.15:	Household taste shocks in MMRF.....	246
Table B.16:	Transport sector energy-efficiency assumptions.....	247
Table B.17:	CSIRO fuel efficiency improvements.....	248
Table B.18:	Non-ferrous metals energy-efficiency shocks.....	248
Table B.19:	Non-metallic mineral energy-efficiency shocks.....	249
Table B.20:	Chemical, rubber and plastics energy efficiency shocks.....	249
Table B.21:	Blast furnace.....	250
Table B.22:	Electric Arc.....	250
Table B.23:	Technology characteristics, MMA.....	251
Table B.24:	Thermal efficiency of new power plants in electricity generation in GTEM.....	252
Table B.25:	Reductions in non-combustion emission intensity in GTEM.....	256
Table B.26:	Reductions in non-combustion emission intensity in MMRF.....	256
Table B.27:	GTEM fugitive/industrial process emission MAC curve parameters.....	257
Table B.28:	MMRF industrial process emission MAC curve parameters.....	258
Table B.29:	MMRF combustion emission MAC curve parameters.....	258
Table B.30:	Cost assumptions, 2007 prices.....	260
Table B.31:	Assumed mill-door price by type in the reference scenario, 2007 prices.....	260
